## TECHNICAL SKILLS

|                                 |                                                                                                  |
|---------------------------------|--------------------------------------------------------------------------------------------------|
| <b>Languages:</b>               | JavaScript (ES6+), TypeScript, Python, HTML5, CSS3, SQL                                          |
| <b>Frontend:</b>                | React.js, Next.js, Tailwind CSS, Bootstrap, Responsive Web Design                                |
| <b>Backend:</b>                 | Node.js, Express.js, Django, Django REST Framework, RESTful APIs, WebSockets, JWT Authentication |
| <b>Databases &amp; Caching:</b> | PostgreSQL, MongoDB, Redis                                                                       |
| <b>Tools &amp; Platforms:</b>   | Git, GitHub, Docker, Vite, Celery, Firebase Authentication                                       |

## PROJECTS

### CampusXP — Gamified Learning & Placement Readiness Platform

[GitHub](#) | [Live Demo](#)

**Tech Stack:** Next.js, TypeScript, Django REST Framework, PostgreSQL, Redis, Celery, Docker, Firebase Auth, Tailwind CSS

- Architected and developed a full-stack gamified learning platform inspired by Duolingo to enhance technical skill acquisition and student placement readiness.
- Engineered core gamification mechanics including dynamic leaderboards, XP rewards, streak tracking, badges, and personalized learning roadmaps.
- Implemented robust REST APIs with Django REST Framework, incorporating secure Firebase Authentication and Role-Based Access Control (RBAC).
- Optimized backend API performance and response times using Redis caching and handled asynchronous background jobs with Celery.
- Containerized the multi-service application with Docker to ensure consistent cross-environment development and deployment.

### ChatSphere — Real-Time Chat Application

[GitHub](#) | [Live Demo](#)

**Tech Stack:** React.js, Express.js, Node.js, MongoDB, WebSockets, JWT, Tailwind CSS, Git

- Built a full-stack, real-time messaging platform enabling low-latency private 1-on-1 chat with persistent message history in MongoDB.
- Utilized WebSockets to implement dynamic user presence features, including real-time online/offline status, typing indicators, and last-seen timestamps.
- Engineered secure user authentication and session management using JSON Web Tokens (JWT) and password encryption.
- Implemented dynamic user relations, including friend request management, real-time contact lists, and profile customization.
- Designed a modern, fully responsive user interface using React.js and Tailwind CSS for seamless mobile and desktop experiences.

## EDUCATION

### Netaji Subhash Engineering College

Expected Graduation: 2027

Bachelor of Technology (B.Tech) in Computer Science & Engineering — Kolkata, West Bengal
