SUMMARY

Full-Stack MERN Developer skilled in building and independently deploying scalable, secure web applications with React.js, Node.js, Express.js, and MongoDB. Experienced in REST API design, JWT authentication, and end-to-end deployment across VPS, Render, and Vercel. Strong DSA foundation with 350+ LeetCode problems solved (Medium/Hard), and a proven ability to own projects from architecture through production, including on-device ML integration.

EDUCATION

Netaji Subhash Engineering College, Kolkata, West Bengal

July 2023 – July 2027

B.Tech in Computer Science and Engineering | CGPA: 7.98

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, SQL

Frontend: React.js, Tailwind CSS, SCSS, Framer Motion, Vite, Responsive Design, React Component Architecture

Backend & APIs: Node.js, Express.js, REST APIs Development, JWT Authentication, MVC Architecture

Database & Caching: MongoDB, Redis, CRUD Operations, Schema Design, Database Optimization

Tools & Platforms: Git, GitHub, Postman, Axios, VS Code, CLI (Command Line), Linux, Nginx, VPS Deployment, Custom Domain/DNS, Render, Vercel

Security & Validation: Bcrypt.js, Input Validation

Concepts: Data Structures & Algorithms, OOP, MVC Architecture, State Management, System Design Basics, Caching (Redis), On-Device ML Integration (MediaPipe), Agile Development, Problem Solving

DSA & COMPETITIVE PROGRAMMING

LeetCode: 350+ problems solved (Easy/Medium/Hard) **Focus:** Arrays, Strings, Trees, Graphs, Dynamic Programming, Sliding Window, Two Pointers, Binary Search, HashMap, and more.

PROJECTS

Clicksy — Full-Stack Social Media Platform [GitHub ↗](#) | [Live ↗](#)

May 2026

React.js · Node.js · Express.js · MongoDB · REST APIs · JWT · SCSS · ImageKit API · Vite · MVC · Render (Backend) · VPS (Frontend)

- Engineered feature-rich social platform with 20+ REST API endpoints covering authentication, dynamic feeds, post CRUD, likes, comments, and follow/unfollow with optimized MongoDB queries.
- Implemented cookie-based JWT session handling, role-aware access control, and ImageKit API for secure media uploads across fully protected frontend and backend routes.
- Crafted mobile-first responsive UI using React and SCSS with reusable components, efficient state management, and smooth real-time interactions.

Predicto — AI-Powered Mood-Based Music Platform [GitHub ↗](#) | [Live ↗](#)

Jul 2026

React.js · Node.js · Express.js · MongoDB · Redis · MediaPipe · JWT · ImageKit · Vite · MVC · VPS (Full Stack)

- Built an on-device mood-detection pipeline using Google MediaPipe Face Landmarker, classifying real-time facial blendshapes into emotional states directly in the browser with no image data sent to the server.
- Engineered a Node.js/Express backend with Redis-based JWT token blacklisting for secure logout, HttpOnly cookie session handling, and MongoDB-backed mood-tagged song queries.
- Automated ID3 metadata ingestion for uploaded tracks and integrated ImageKit CDN for audio/artwork storage, powering a full-featured custom playback UI with seek, queueing, and volume control.

Solvit Counselling — Full-Stack Counselling Platform [GitHub ↗](#) | [Live ↗](#)

Jun 2026

React.js · Node.js · Express.js · MongoDB · JWT · REST APIs · Axios · Sass · Vite · Mongoose · VPS (Full Stack)

- Built a full-stack counsellor discovery platform with a Node.js/Express backend, MongoDB persistence, and cookie-based JWT authentication for secure registration and login.
- Developed a React 19 + Vite frontend with counsellor search, specialization-based filtering, and a booking request UI, integrated with the backend via Axios REST calls.
- Implemented production-ready security practices including bcrypt password hashing, configured CORS, and environment-aware secure cookie settings for cross-origin auth.
